SUMMARY

Enthusiastic Frontend Developer with hands-on experience in React.js, Typescript and modern web development libraries. Skilled in component-based architecture, state management with Redux and Context API, integrating RESTful APIs and version control using Git. Experience in Agile development workflows.

TECHNICAL SKILLS

Programming Languages: Typescript, JavaScript, PHP

Frameworks & Tools: React.js, TailwindCSS, Framer Motion, Firebase, Git, Github, MySQL, Vite, Bootstrap, Netlify, Render, Photoshop, Illustrator

EXPERIENCES

One Project One Week Hackathon | NoteSpace - AI-Powered Note-Taking Platform

Team Achievement | Team of 6 Developers & Designers

- Delivered a complete MVP in 7 days featuring:
 - AI-powered PDF-to-notes conversion
 - Interactive knowledge graphs using React Flow
 - Real-time note editor with Quill.js
 - Public sharing and bookmarking system
- Implemented full-stack architecture: Django (Backend), React (Frontend), LangChain (AI)
- Conducted daily standups and design sprints to maintain rapid iteration pace
- Technical Stack
 - Frontend: React, React Flow, Quill.js, Tailwind CSS, Axios
 - Backend: Django, LangChain, LangGraph
 - Tools: Git, Figma, Postman

Founder & Content Creator | ACE-GAMING (2019 – Current)

- Grew an audience of 900K+ by optimizing user engagement strategies, content design, and analytics.
- Developed digital assets (thumbnails, infographics) using Photoshop and Illustrator.
- Lead content strategy, audience engagement, and brand collaborations, including sponsorships and influencer partnerships.

Talent Star | Tier One Entertainment (2020 –2022)

- Represented as an official talent star as content creator under Tier One Entertainment, a leading gaming and esports talent agency.
- Produced high-quality gaming content, including live streams, video highlights, and educational guides.
- Collaborated with international brands and creators to deliver high-impact promotional media.

PROJECT EXPERIENCES

NoteSpace | Ai-Powered Note-Taking Platform

React Frontend Developer | React.js, TailwindCSS, Framer Motion, Git | [Github](#)

- Integrated 5+ Django REST API endpoints for note CRUD operations and AI processing.

- In the event I developed the Landing Page, Main Dashboard, website animation and interactive **Knowledge Graph** (React Flow) to visualize note relationships.
- Contributed to pitch preparation by demonstrating frontend innovations to judges

Randomly | Real-Time News

React.js, TailwindCSS, Node.js, Render, Netlify, Git | [Github](#)

- Built a responsive news website where users can explore real-time articles.
- Optimized API data fetching with React Loaders & Actions, reducing load times and improving user experience.
- Implemented authentication for visitors and admins, with full CRUD operations for articles.

MSM | Mini Social Media

Php, Html, TailwindCSS, MySQL | [Github](#)

- Developed a simple social media site where users can post, comment, and search content.
- Designed a secure authentication and user account management (profile photo, changing account name or password) with PHP & MySQL.

Taiju | Personal Link Manager

React.js, TailwindCSS, Firebase | [Github](#)

- Built a link collection app with Firebase authentication & real-time database.
- Used React Router & React Hook to update UI instantly with new user data.

EDUCATION

Bachelor of Arts in English (Final Year)

Dagon University, Myanmar

Certifications & Skills:

- Japanese Language Proficiency - JLPT N3
- English Language Proficiency - Upper Intermediate B2
- Certification in Graphic Designing - Landscape Digital Art (2021)
